DANIEL RAZUMOV

Frontend Developer (React/Next.js/Zustand)

About Me

I'm a Frontend Developer from Kazakhstan with 3 years of commercial experience. I entered IT without a university degree or courses — inspired by the philosophy and essence of development. To this day I never stop, striving to become a better version of myself every day.

Work Experience | 3 years, 3 months

(Middle) • Frontend Developer **2023 – 2026**

Contract outsource development: E-Commerce, EdTech, Logistics, FinTech (PFM). Primarily team-based work.

1) E-Commerce (solo): Branded clothing online store + promo landing page.

- Mobile-first per client mockup; proposed and implemented UX improvements. Reduced purchase path from 7 to 3 steps (landing → product card → checkout/payment). Delivered full source documentation.
- FSD architecture, shadcn/ui UIKit, RSC-first approach on Next.js. Stack: React, Next.js, TypeScript, CSS Modules, Zustand, Zod + React Hook Form, TanStack Query, shadcn/ui, Tabler Icons.

2) EdTech (team): Online learning platform. Student personal account.

- Implemented course progress, schedule, and notification modules. Decomposed 23 components from legacy into a design system, reducing ~3,000–4,500 lines of code.
- FSD architecture, A11y support. Stack: React, Next.js, TypeScript, Tailwind CSS, Redux, Zod + React Hook Form, TanStack Query, Recharts.

3) Logistics (team): Freight management platform.

- Built order tracking and route management UI. Virtualized tables for large datasets with filtering. Initiated migration from custom table logic to TanStack Table for scalability and maintainability.
- Classic → FSD architecture, shadcn/ui UIKit. Stack: React, Next.js, TypeScript, Tailwind CSS, TanStack Query, TanStack Table.

4) FinTech / PFM (team): Personal finance management platform.

- Developed dashboard: income/expense charts, spending categorization, filterable transaction history. Optimized re-renders with useMemo, React.memo, debounce. Lazy-loaded Framer Motion via a custom wrapper.
- FSD architecture, Material UI UIKit, i18n (localization). Stack: React, Next.js, TypeScript, Tailwind CSS, Zustand, TanStack Query, Recharts.
